Dear Mr. Borisov!

I appreciate your continued business cooperation with us.

In terms of PAO (Poly Alpha Olefin) percentage in our products series of PAO 100, we confirm that the below facts are true and correct.

The PAO series are made on the basis of our own and unique formulation, which is developed by inhouse R&D department of C and Lube Co. Ltd.

We use the highest quality polyalphaolefins (PAO) produced by Mobil USA, combine with the latest additive package produced by INFINIEUM. For your information, the PAO content in the base oils is about 83-86%. The content of PAO in EAGLE PAO-100 products is at least 60%.
